Marital status: Single

## EXPERIENCE

### FRONT-END DEVELOPER | 03.2017 – present

*\* Artsoft Consult \**

- Projects I was involved in:
  - \* one of the biggest manufacturer of plastic products in Europe
  - \* a project for managing resources for constructions
  - \* a project for monitoring the waste from restaurants and improve resource managing
- Technologies used:
  - \* angularjs, angular 2/4, nodejs, html, css, javascript, jQuery, phonegap, mocha, d3

### FRONT-END DEVELOPER | 01.2015 – 03.2017

*\* Xoomworks \**

- Java core training
- Selenium training
- Databases training
- Front-end training
- After the trainings I had the my first project on AngularJS
- At the end of the AngularJS project I joined the BI department
  - BI training
  - Learned how to use some SAP tools
  - In a short period of time I had my first project in BI for Expedia as a subcontractor
    - Expedia was a three months project during which I learned how to work with databases (Teradata)
    - Immediately after Expedia I had a new contract for Shell as a subcontractor
      - Shell was a one year contract during which I finished four web applications
      - Shell projects involved working with: SAPUI5, HTML, XML, Json, CSS, Javascript, jQuery, XSJS, XSODATA, HANA database
      - During the Shell contract I had also started two other projects that involved working with: Spring (back-end), Angular2 (front-end), SQL Server (database)
      - The great work at Shell resulted in Xoomworks hiring more developers to work for Shell
      - I helped with the recruitment process for the technical part of the interview
      - I helped the new developers to understand SAPUI5 framework and prepared them for the Shell projects
